Introduction on Data Channel Enhanced IMS Network

CMCC/Bai Xueqian

www.10086.cn

- ◆ **IMS Voice Service Status Analysis**
- ◆ **Data Channel Overview**
- ◆ **Data Channel Enhanced IMS Network**

Challenge Analysis

❑OTT business growing up

OTT Voice and Video utilization keep growing up at a rapid rate

❑IMS/VoLTE user experience

IMS/VoLTE call service needs to be improved in more diverse user experience

❑Service tightly coupled with network

IMS/VoLTE call service has a tight coupling with network and the service evolution is limited

Note: Telecom Incoming Ratio from MIIT Report

IMS Voice Service Status Analysis

5G is driven by the ever increasing need for higher data speeds and new services, the **high transmission speed**, **low latency** and **high reliability** make it possible to enable diversified services in 5G period, not only **consumer**, but also **enterprise and vertical business**.

Digital Voice
Lower data rate

Digital Voice
Middle data rate

IP based voice
Mobile Broadband

IT based、Cloud based、
Super-Broadband

2G Voice, TXT

3G Voice, Standard video

4G 1080p/4K HD Video

5G 8K、XR
Holographic Communication

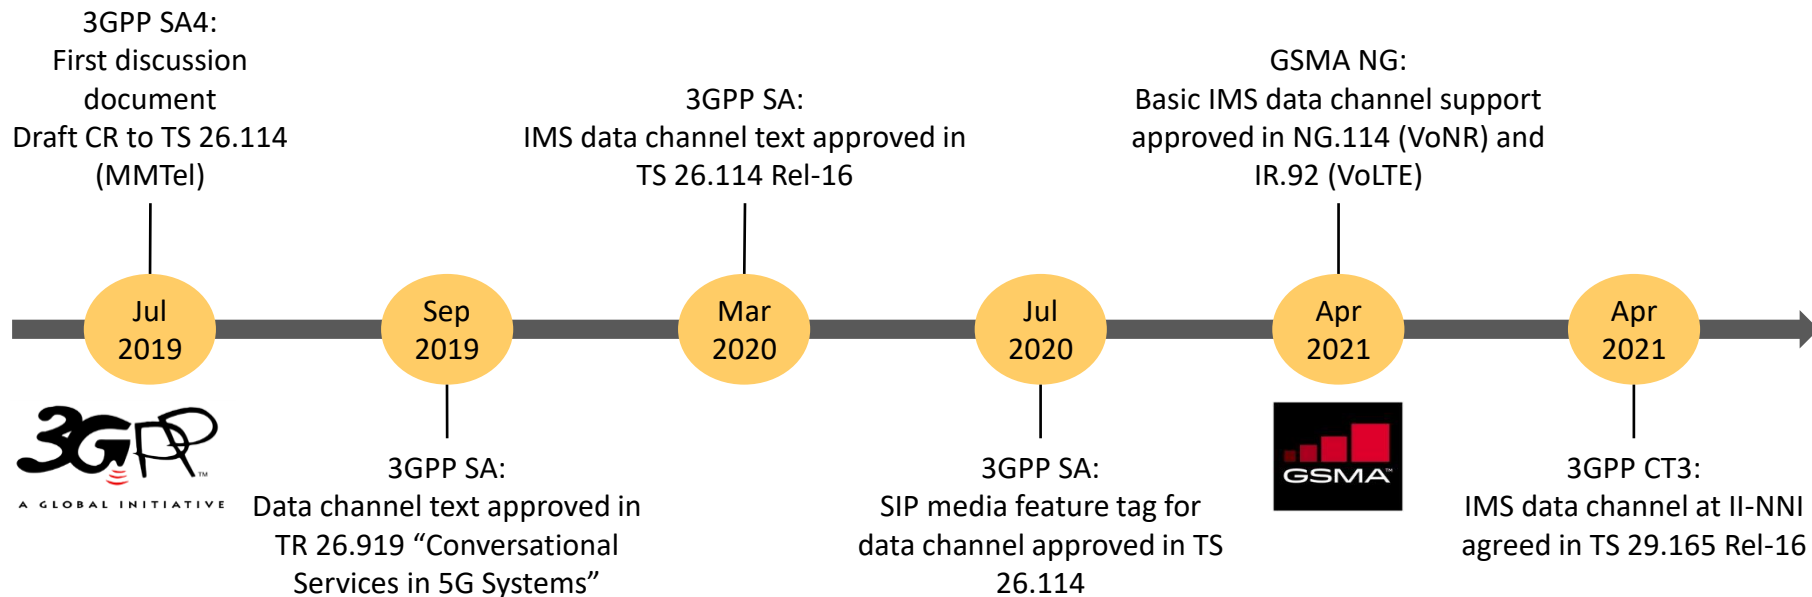

3GPP、IETF、GSMA、W3C standard organization has actively research on **next-generation voice** and **mutual real-time communication** services enhancement

◆IMS Voice Service Status Analysis

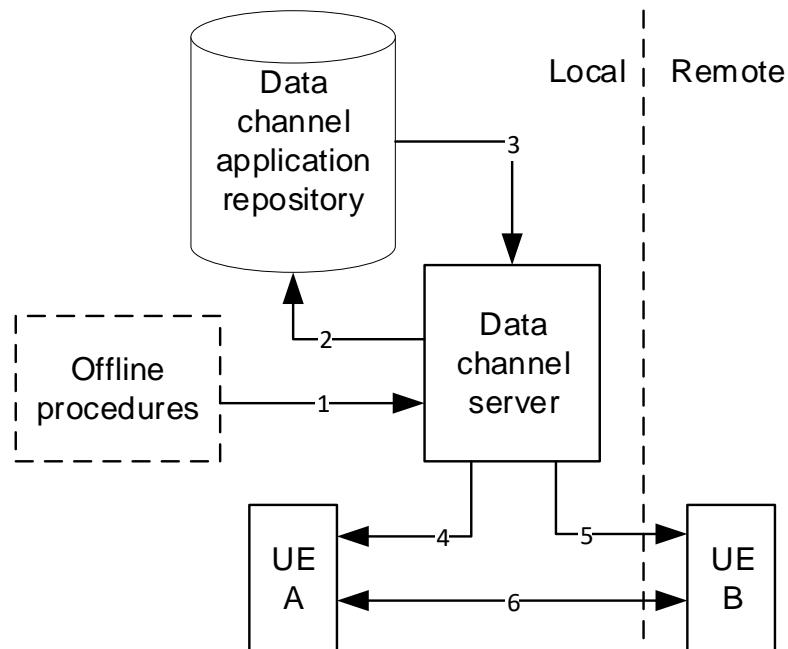

◆Data Channel Overview

◆Data Channel Enhanced IMS Network

Data Channel Standard Overview

- ❑ IETF: WebRTC data channel protocol
- ❑ W3C: WebRTC data channel component API standardized

- Application uploaded
- Application retrieved
- Sent through bootstrap data channel to UE
- Additional data channel build up

Compatibility

Realize based on SIP/SDP, compatible with VOLTE/VONR

Flexibility

Deploy in parallel or independently with SIP call

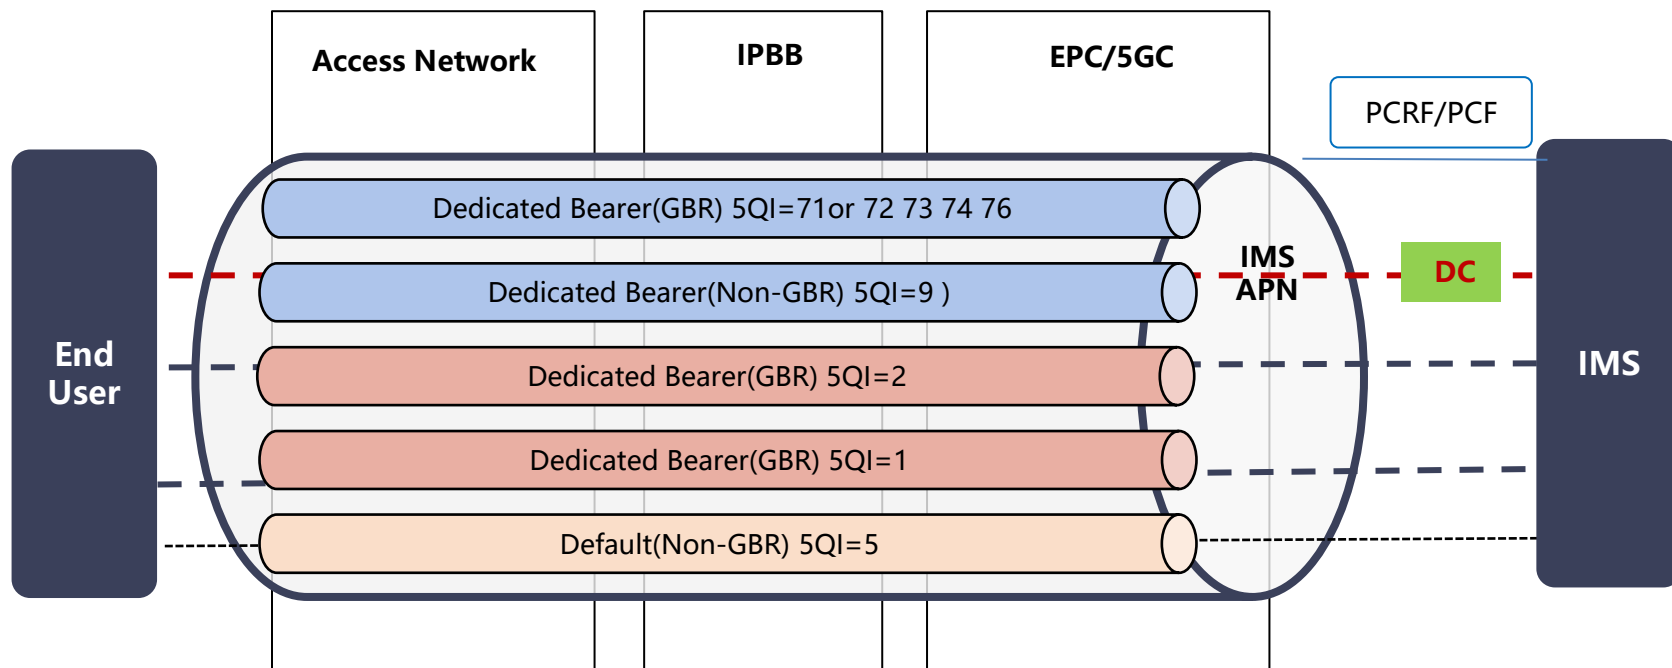

Enrichment

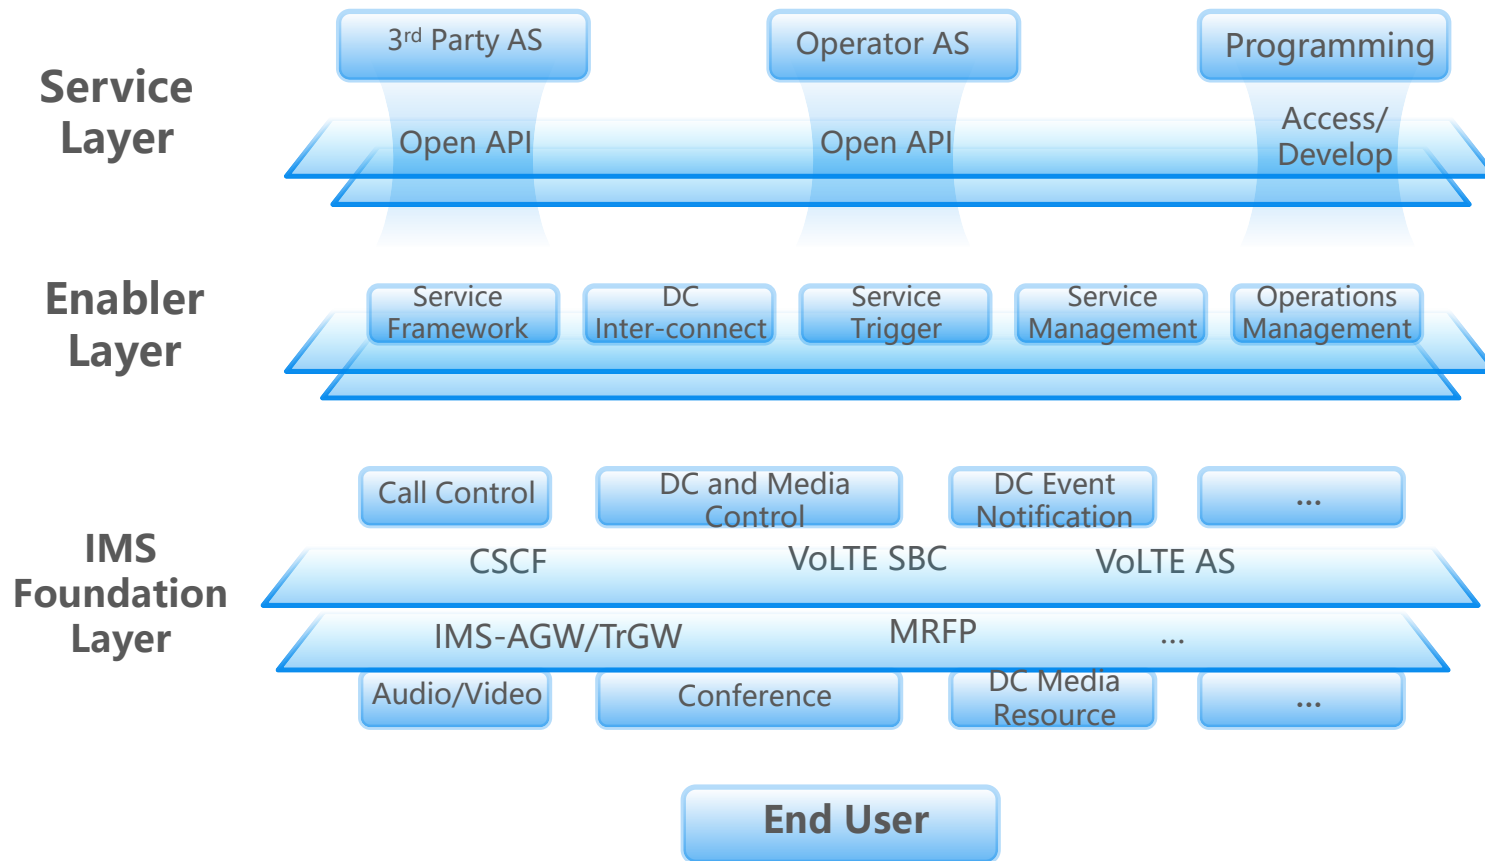

De-couple with data content, supports rich types of data transmission

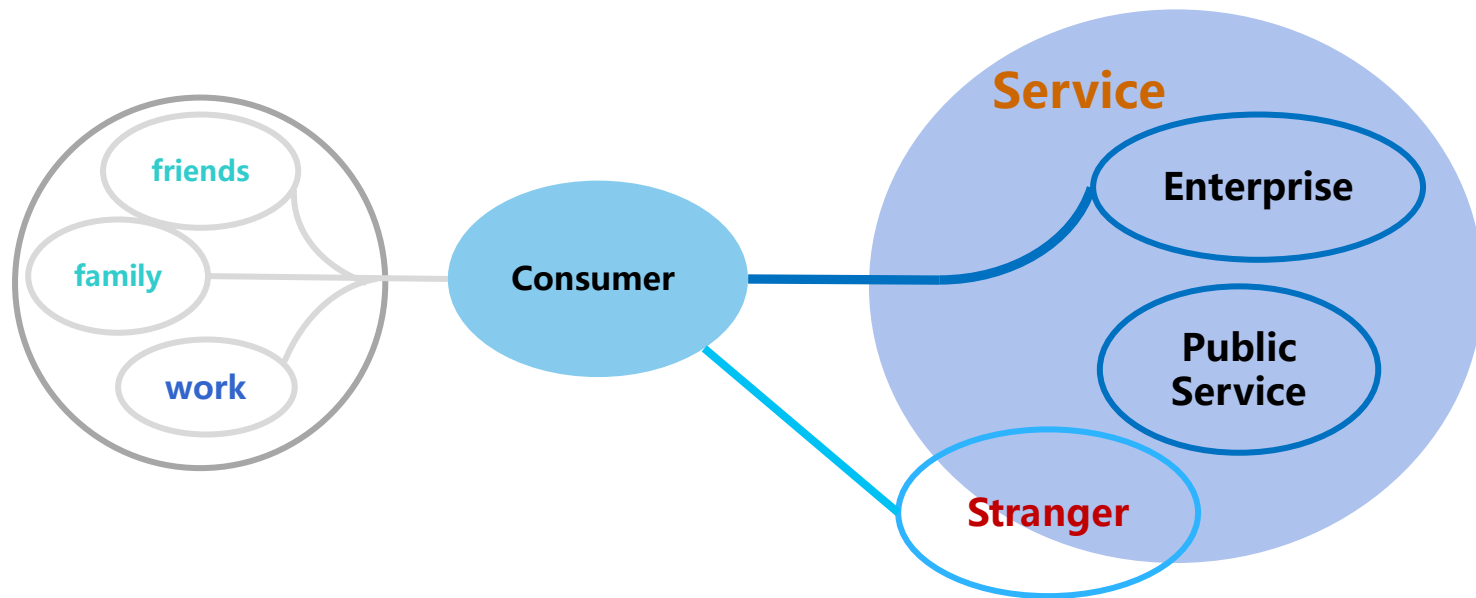

Efficiency

SCTP based real-time stream can be built up on demands and takes high efficiency usage on network resource

Consumer telephony
with more fun with
diversity media, AR,
sharing, gaming, etc.

Enterprise telephony
with more efficient
business support,
more safely
collaboration through
multimedia ID, AI, etc.

Interactive Calling Use Cases

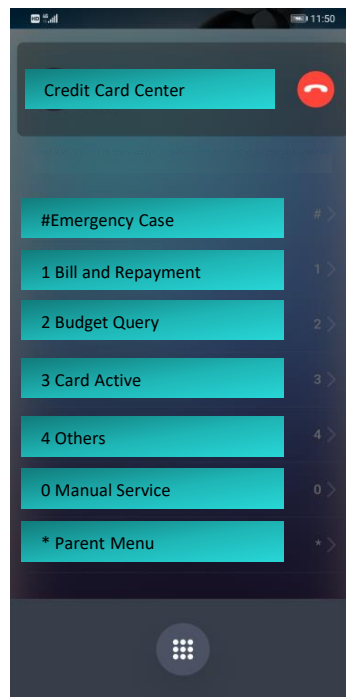

Call in fun

Enterprise ID

Interaction Menu

Remote Support
